NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE FIRST QUARTER OF 2026*Unit : Vietnamese Dong***I. GENERAL INFORMATION OF THE CORPORATION****1. Forms of Ownership:**

Sacom Land Corporation was established and operates activities under Enterprise Registration Certificate of joint stock company No. 4703000566 issued by Dong Nai province Department of Investment and Planning for the first time on 07 July 2008, 18th re-registered on 26 June 2025.

The Corporation's head office is located in Bien Hoa 1 Industrial Zone (within the premises of Cable and Telecommunications Materials Joint Stock Company), Tran Bien ward, Dong Nai province.

The number of employees of the Corporation as at 31 March 2026: 19 employees (as at 01 January 2026: 17 employees).

2. Business field:

Real estate.

3. Business Activities:

Main business activities of the Corporation are: investment, business and renting real estate.

4. Normal business and production cycle.

The normal business cycle of the Company is carried out within a period not exceeding 12 months.

5. Declaration on Comparability of Information in Financial Reports

On October 27, 2025, the Ministry of Finance issued Circular No. 99/2025/TT-BTC providing guidelines on the corporate accounting regime, replacing Circular No. 200/2014/TT-BTC. Circular 99 is effective for fiscal years beginning on or after January 1, 2026. Accordingly, the Company has applied the new regime and restated comparative figures (if any) to ensure comparability.

II. ACCOUNTING PERIOD, CURRENCY USED IN ACCOUNTING**1. Accounting Period:**

The Company's fiscal year begins on January 1 and ends on December 31 of each year.

2. Currency Used in Accounting:

The currency used for accounting purposes is the Vietnamese Dong (VND)

III. APPLICABLE ACCOUNTING STANDARDS AND REGULATIONS.**1. Applicable Accounting System:**

The Company applies the Accounting Regime for Enterprises issued under Circular No. 99/2025/TT-BTC ("Circular 99"), guiding the accounting regime for enterprises as promulgated by the Ministry of Finance on October 27, 2025.

2. Declaration of Compliance with Accounting Standards and Regulations:

The Company has applied the Vietnamese Accounting Standards and related guidance documents issued by the Government. The financial statements are prepared and presented in full compliance with the regulations of each standard, guiding circulars, and the applicable accounting regime.

3 Applied Accounting Ledger Form:

The Company applies the General Journal method

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES.

1. Cash

Cash and cash equivalents include cash on hand and bank deposits

Cash equivalents are short-term investments with the maturity of not over than 03 months from the date of investment, that are highly liquid and readily convertible into known amount of cash and that are subject to an insignificant risk of conversion into cash.

2. Financial Investments

Trading securities are initially recognized at original cost which includes purchase prices plus any directly attributable transaction costs such as brokerage, transaction fee, cost of information provision, taxes, bank's fees and charges. After initial recognition, trading securities are measured at original cost less provision for diminution in value of trading securities. Upon the liquidation or transfer, cost of trading securities is determined using weighted average method.

Held-to-maturity investments refer to loans held until maturity to earn periodic interest income.

Dividends received in the form of shares are only recorded as an increase in the number of shares received, not as an increase in the investment's value or financial income.

Provision for devaluation of investments is made at the end of the period as follows: Investments in trading securities: provision shall be made on the basis of the excess of original cost of the investments recorded in the accounting book over their market value at the provision date.

3. Inventories

Real estate inventories purchased or constructed for sale during the Company's normal business operations (not for leasing or holding for appreciation) are recognized at the lower of cost or net realizable value.

The cost of real estate inventories includes:

- Land use fees and rental fees;
- Construction costs paid to contractors;
- Interest expenses, consultancy fees, design fees, leveling costs, compensation and resettlement costs, general management costs, and other related expenses.

Net realizable value is the estimated selling price of the real estate inventories under normal business conditions, based on market prices at the reporting date, discounted for the time value of money if significant, and less estimated completion and selling costs.

The cost of sold real estate is recognized in the interim income statement based on the direct costs forming the real estate and general costs allocated on an area basis.

Other inventories:

Other inventories are recognized at the lower of cost or net realizable value.

Net realizable value is the estimated selling price of inventories under normal business conditions, less the estimated completion and selling costs.

The Company uses the perpetual inventory method to account for inventories, with values determined as follows:

- Goods, tools, and equipment – purchase cost determined by specific identification method
- Work-in-progress real estate – construction costs determined by specific identification method

4. Receivables

Receivables are presented in the interim financial statements at the carrying value of accounts receivable and other receivables, net of provisions established for doubtful debts.

The provision for doubtful accounts reflects the portion of receivables that the company expects to be uncollectible at the end of the reporting period. Any increase or decrease in the provision balance is recognized as an administrative expense in the interim income statement.

5. Tangible Fixed Assets

Tangible fixed assets are recorded at cost less accumulated depreciation.

The cost of tangible fixed assets includes the purchase price and directly related expenses to bring the asset into its intended use.

Expenses for procurement, upgrades, and renovation of fixed assets are added to the cost of the asset, while maintenance and repair expenses are recognized in the interim income statement when incurred.

6. Depreciation

Fixed assets are depreciated (amortised) using the straight-line method over their estimated useful life as follows:

Buildings and structures	25 years
Management software	3 years
Transportation equipment	8 years
Office equipment and furniture	4 - 5 years
Other assets	5 - 10 years

7. Investment Properties

Investment properties are recorded at cost, including transaction-related expenses, less accumulated depreciation.

Expenses related to investment properties incurred after initial recognition are added to the remaining value of the investment property if the Company expects to derive additional economic benefits beyond the original assessed performance of the investment property.

Depreciation of investment properties is calculated using the straight-line method over their estimated useful lives, as follows:

Buildings 25 year

Investment properties are derecognized from the interim balance sheet after being sold or when they are no longer in use, and no economic benefits are expected from their disposal. The difference between the net proceeds from the sale and the carrying value of the investment property is recognized in the interim income statement during the disposal period.

Transfers between owner-occupied properties or inventory to investment properties occur only when there is a change in usage, such as when the owner ceases using the asset and begins renting it out or completes the construction phase. Transfers from investment properties to owner-occupied properties or inventory occur only when there is a change in purpose, such as when the owner begins using the asset or intends to sell it. Transfers do not alter the cost or carrying value of the property at the date of conversion..

8. Borrowing Costs

Borrowing costs include interest expenses and other costs incurred directly related to the Company's borrowings.

Borrowing costs are recognized as expenses in the period in which they are incurred, except for amounts capitalized as per the provisions below.

Borrowing costs directly attributable to the acquisition, construction, or production of a qualifying asset that takes a substantial period to prepare for its intended use or sale are capitalized as part of the cost of the asset.

9. Prepaid Expenses

Prepaid expenses include short-term or long-term prepaid expenses recorded on the interim balance sheet and are allocated over the prepaid period or the period during which the economic benefits from these expenses are realized.

10. Payables and Accruals

Payables and accruals are recognized for amounts to be paid in the future related to goods and services received, regardless of whether the supplier has invoiced the Company.

11. Profit Distribution

Net profit after corporate income tax (excluding gains from bargain purchases) may be distributed to shareholders after approval by the General Meeting of Shareholders and after allocating to reserve funds according to the Company's Charter and Vietnamese legal regulations.

The Company allocates the following reserve funds from net profit after corporate income tax upon the recommendation of the Board of Directors and approval by shareholders at the annual General Meeting of Shareholders:

Bonus and Welfare Fund

This fund is established to reward, incentivize, and enhance welfare for employees and is presented as a liability on the interim balance sheet.

12. Revenue Recognition

Revenue is recognized when it is probable that the economic benefits can be reliably measured. Revenue is measured at the fair value of the amounts received or receivable, net of trade discounts, sales returns, and allowances. Specific recognition criteria must also be met, as follows:

Sales Revenue:

Recognized when significant risks and ownership of goods have been transferred to the buyer, typically coinciding with the delivery of goods.

Apartment Sales Revenue:

For completed apartments sold, revenue and cost are recognized when significant risks and benefits associated with the apartments have been transferred to the buyer.

Interest Income:

Recognized on an accrual basis unless collectability is uncertain.

Rental Income

Income from rental of assets under operating lease agreements is recognized in the interim income statement using the straight-line method over the lease term.

Service Revenue

Recognized when the service has been rendered and completed.

13. Tax

Current Income Taxes

Current income tax assets and liabilities for the current and prior periods are determined based on the amounts expected to be recovered from or paid to the tax authorities, calculated using the tax rates and tax laws that have been enacted by the balance sheet date.

Current income taxes are recognized in the interim income statement, except for instances where the tax relates to an item recorded directly in equity, in which case the tax is also recognized directly in equity.

The Company offsets current income tax assets and liabilities only when it has a legally enforceable right to offset the recognized amounts and intends to settle on a net basis or to realize the asset and settle the liability simultaneously.

Deferred Income Taxes

Deferred income taxes are calculated on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts in the interim financial statements.

Deferred income tax liabilities are recognized for all taxable temporary differences.

Deferred income tax assets should be recognized for all deductible temporary differences, the deductible amounts carried forward of tax losses, and unused tax incentives, provided that it is probable that taxable profits will be available in the future to utilize these deductible temporary differences, tax losses, and unused tax incentives.

The carrying amount of deferred income tax assets must be reviewed at the end of the accounting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the benefit of part or all of the deferred income tax assets to be utilized. Previously unrecognized deferred income tax assets are re-evaluated at the end of the accounting period and recognized when it becomes probable that future taxable profits will be sufficient to utilize these unrecognized deferred income tax assets.

Deferred income tax assets and liabilities are measured at the tax rates expected to apply to the accounting period during which the assets are realized or the liabilities are settled, based on the tax rates and tax laws that are enacted or substantively enacted by the end of the accounting period.

Deferred income tax is recognized in the interim income statement, except for cases where the tax arises from an item recorded directly in equity, in which case the deferred income tax is also recognized. A company is only permitted to offset deferred income tax assets and deferred income tax liabilities when it has the legal right to offset current income tax assets against current income tax liabilities, and the deferred income tax assets and liabilities relate to corporate income taxes managed by the same tax authority for the same taxable entity. Alternatively, the company must intend to settle the current income tax liabilities and assets on a net basis or to realize the assets and settle the liabilities simultaneously in future periods when the significant amounts of deferred income tax liabilities or assets are settled or recovered.

14. Related parties

Related parties are considered to be enterprises – including parent companies, subsidiaries, and associates – as well as individuals, either directly or indirectly through one or more intermediaries, that have the power to control the Company, are controlled by the Company, or jointly control the Company. Related parties also include individuals or entities that directly or indirectly hold voting rights in the Company, significantly influencing the Company, key management personnel such as directors and officers of the Company, close family members of these individuals, or entities related to these individuals.

In considering the relationship of each related party, the substance of the relationship is emphasized rather than its legal form.

V. SUPPLEMENTARY INFORMATION FOR THE ITEMS PRESENTED IN THE BALANCE SHEET.

	31/03/2026	01/01/2026
1. Cash and cash equivalents
